TIMSS27 DC - Submission - Plunet Guide for IEA

Access

Access the platform with the following link: <https://plunet.capstan.be>

Log in with your credentials.

Usernames are your email addresses.

The password is set up on your side. If you forget the password, please use the password reset sequence (**Set up new password**) from the login screen to set a new password.

A screenshot of the Plunet login interface. It features a white login box with a blue border. At the top left is the word "Login" in blue, and at the top right is a language selector "EN" with a dropdown arrow. Below this are two input fields: "User name" and "Password". To the right of the "Password" field is a link that says "Set up a new password" with an eye icon. Below the input fields is a blue "Log in" button. At the bottom of the box is a link that says "Problems during login?".

Workflow

The workflow for TIMSS27 DC in Plunet is set up as shown above. The active step outlined in these instructions is shown in red and explained below.

Client Submission (CSU): This step is used to track which translation sets need to be submitted to cApStAn. Once the client submits the materials, the status changes so cApStAn knows they are ready for verification.

Verification (VER): At this step, cApStAn performs translation verification and review to ensure quality and consistency. When verification is complete, the task moves forward in the workflow.

Client Sign-off (CSO): Here the client reviews the verified files to confirm they meet expectations. The client may approve the files, request revisions, or share comments with cApStAn. If there are no queries and the deliverables can be considered signed-off, the client should deliver the task.

Navigation

To submit a locale and set for verification, make sure you are logged in with the correct user account.

1. In your dashboard, click on **Jobs (###)** and get the list of all jobs below. Where ### is the total number of jobs currently with IEA.
